The Biological Sciences major is a broad field that provides a basic scientific foundation for individuals to pursue a career in any science related field. Biologists study all living organisms, their function, and their relationships to their environment. The Biological Sciences major offers you the freedom to accomplish either great breadth or a deep focus in an area not represented in the department’s other majors. The major combines core biology requirements with electives to allow you to make your own individualized combination of courses to promote and further your special interests.

Some Characteristics of Biological Sciences Majors:
♦ Interests in multiple areas of science
♦ Conducting research in the laboratory or field
♦ Desire to learn about living organisms
♦ Desire for intellectual growth
♦ Interest in government, academic, or private jobs
♦ Precision and attention to details
♦ Inquisitive

What You Gain From Studying Biological Sciences:
Knowledge:
The major provides a solid science foundation with the flexibility of selecting courses that best fit your interest and career goals. The Biological Sciences major prepares students for science related graduate programs and health-profession schools.

Skills:
♦ Critical thinking and problem solving
♦ Work independently and on a team
♦ Experimental design
♦ Understand various biological processes
♦ Use of scientific lab equipment
♦ Record, analyze, and summarize data
♦ Oral and written communication

Participate in Student & Professional Organizations:
Student (Sponsored by Bio. Sci. Dept):
Biology Club
Birding & Ornithology Club
Ecology Club
Pre-Vet Club
Tri-Beta Biological Honor Society

Professional:
American Assoc. for the Advancement of Science
American Institute of Biological Sciences
American Society for Microbiology
Federation of American Societies for Experimental Biology

Careers in Biological Sciences:
Employment:
Biological Sciences employment opportunities exist in medical, dental, veterinary, ecological, genetic, public health, research, teaching, administration, sales, service, and manufacturing fields in government agencies, educational institutions, private business, and industry. Many entry level bio. sci. jobs accept a Bachelor’s degree. You can advance from entry level to higher-level positions with additional education.

Need Bachelor’s Degree
Agriculturist
Animal scientist, trainer
Biologist (Environ., fisheries, plant, marine, wildlife)
Biomedical researcher
Botanist
Ecologist
Food microbiologist
Lab tech
Microbiologist
Park ranger
Science writer

Need Further Education
Chiropractor
Dentist
Dietician
Epidemiologist
Genetic counselor
Illustrator
Lawyer
Museum curator
Optometrist
Pharmacist
Pathologist
Physician, asst.
Professor
Learn More About Biological Sciences Careers:

Biological Sciences Advisors:  Langley A258
www.biology.pitt.edu/undergraduate/advising

- Join the Bio. Newsletter for announcements
- Get advising info. before & after declaring major
- Learn about useful courses
- Inquire about research & internship opportunities

Career Development:  WPU 2nd Floor
www.careers.pitt.edu/

- Meet with a Career Counselor (in person or virtual)
- Take interest inventories and self-assessment tests
- Assistance w/ CVs, resumes, & cover letters
- Internship placement
- Employment search – via Future Links & Pitt
- Job shadowing program
- Career fairs

What You Can Do Now:
- Gain research experience by teaming with a Biology (or related field) professor and conducting research
- Get an internship at the CDC, NIH, hospital/clinic, research lab, public health dept, forensics lab, medical school, or Bio. Engineering company
- Get a part-time or summer job in a lab, hospital, or mol. bio. dept.
- Study abroad to broaden cultural perspective and gain international experience

Ways To Acquire Skills in Biological Sciences:

Internships
Internships provide hands-on experience in an area that interests you as a potential career. To find a biology related internship speak with a Bio. Sci. advisor or a Career Development advisor, and visit the links below.
- www.biology.pitt.edu/undergraduate/research/outsid-e-pitt
- www.biology.pitt.edu/undergraduate/research-internships/starting-intern

Research
Various opportunities exist for students to participate in research experiences outside of the classroom to develop an understanding of inquiry based research. Research can be performed on campus during the term for credit or no credit, or during the summer as part of an undergraduate research experience program (REU, fellowship, co-op) on or off-campus. Check deadlines early.

Undergraduate Teaching Assistant (UTA)
Being an undergraduate teaching assistant is a terrific way to share your knowledge, gain confidence, and prepare yourself for leadership roles. Many courses utilize UTAs, and you should contact the instructor directly.

Places Biological Sciences Majors Have Interned:
Allegheny Cty Corner’s Ofc.  Pitt Pharmacology
Carnegie Museum  Safer Center for
Critical Care Medicine  Rehab. Research
GAI Consultants  Starz Transplant Inst.
GSPH – Human Gen., IDM  Teach for America
Hillman Cancer Center  ThermoFisher
Magee Women’s Research  Scientific
National Aviary  UPMC
Pittsburgh AIDS Task Force  Wildlife Rehab. Ctr.
Pitt Dental, Ortho, Pathology

Tutoring & Study Resources
Academic Resource Center  Math Assistance Ctr.
Calculus & Statistics Labs  Writing Center
Fish Bowl – Chemistry Dept.
Learning Communities – Various residence halls

This handout provides a brief sample of skills, jobs, and tips for individuals pursuing a degree in this major. It is not an exhaustive listing, but it gives initial insight into a particular career field that would employ the skills and knowledge gained through this major. Contact the Biological Sciences Advisors if you have any questions.
